

# HUME DOORS & TIMBER PRODUCT CATALOGUE 2019

"When it comes to designing a home the natural flow and seamless integration of the inside and out is important. Doors play a pivotal role in this design element. Practical consideration to door design helps provide timeless aesthetics for your home."

- Janet Coker, Specifying Dynamics

- To innovate and make a difference in your home
- To continue to build valued relationships with staff, suppliers and distributors
- To continue to improve on our environmental sustainability and recycling

Hume Doors & Timber is the nation's largest 100% Australian owned timber door manufacturer with over 60 years of proud history. Hume Doors will always stand by its family based values and exceptional customer service. Whether leading the way in sustainability, innovation or design, Hume Doors & Timber remains committed to developing outstanding products for the Australian market.

Hume Doors & Timber complies with Australian Standard AS 2688-2017 for the manufacture and importation of timber doors.

## ENVIRONMENTAL STATEMENT

Hume Doors & Timber is committed to operating its entire business processes in an environmentally sustainable manner at all times. We embrace environmental awareness, protection and enhancement. Our goal is to be regarded as an environmentally responsible corporate citizen that practices environmental stewardship and provides our valued customer base with complete confidence that our products have been produced in accordance with applicable independent environmental standards.

- Hume Solar Power Scheme Reducing our carbon footprint
- · Reusing and recycling by-products, packaging and waste material
- Reducing the level of packaging and consumables used
- · Capturing, storing and using rainwater for our water needs
- Maximise transport loads, thus reducing energy requirements

## FSC® & PEFCTM CERTIFICATION

#### **FSC® CERTIFICATION**

Hume Doors & Timber (Aust) Pty Ltd is a certified member of the Forest Stewardship Council® (SGS-CoC-009377).

#### FSC® CERTIFICATION

Hume Doors & Timber (Qld) Pty Ltd is a certified member of the Forest Stewardship Council (SGS-CoC-009405).

#### PEFC™ CERTIFICATION

Hume Doors & Timber (Aust)
Pty Ltd is a member of the
Programme for the Endorsement
of Forest Certification Schemes
(SGS-PEFC/CoC-1532).

## BAL COMPLIANCE

Hume Doors & Timber has extensively tested its comprehensive range of doors and door frame systems, which include both hinged and pivoted entry frame systems up to 2700 x 1200, to meet the AS1530.8.1 criteria set for buildings in BAL (Bushfire Attack Level) zoned areas without compromising on functionality and aesthetics.

Look out for our BAL symbol throughout our Catalogue for compliance. Doors must be installed as per AS3959 to conform to BAL (Bushfire Attack Level) compliance. Refer to our website for further information: www.humedoors.com.au

### **SOUND RATING**

Hume Doors & Timber has extensively sound tested its comprehensive range of doors. Sound Transmission Class (STC) tested to ASTM E 413-87 and Acoustic Weighted Reduction (Rw) tested to ISO 717-1.

Look out for our sound rating symbol throughout our Catalogue. To achieve the rating doors must be installed with seals of equivalent RW/STC and must be installed as per the seal manufactures recommendations. Refer to our website for further information; www.humedoors.com.au

# HUME DOORS & TIMBER

### FLOOR TO CEILING CAVITY UNIT

- · Impressive large door openings
- · Virtually invisible hidden track system
- · Soft closer prevents door slamming
- One touch operation push to release door

The Evolution Premium cavity unit is a floor to ceiling, zero clearance sliding door system. Hume Doors have designed the cavity unit to enable the track to finish flush with the ceiling, allowing for impressive full size openings to be achieved with a minimal gap between the door, floor and ceiling.

For more information visit www.humedoors.com.au/door-systems

### EVOLUTION TIMBER CAVITY UNIT OPENING SIZES

- A = Door height + 70mm (QLD. SA. TAS. WA)
- A = Door height + 80mm (NSW. VIC. ACT)
- B Opening width for Flush pull = 2 x Door + 10mm (Flush pull the door protrudes 50mm)
- B Opening width for Flush jamb = 2 x Door + 60mm (Flush jamb the door is flush with split jamb)

NOTE: Unit size is tight, please allow extra for packing when preparing the opening

### 35mm Doors recommended for all Cavity Units

EVOLUTION TIMBER CAVITY UNIT INSTALLATION VIDEO

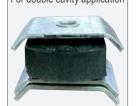

Scan QR code to view our installation video or visit: www.humedoors.com.au/diy

Super smooth ball bearing assembly and carrier featuring nylon lock tab for easy door removal and reinstallation without additional adjustments required.

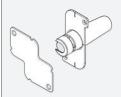

### CAVITY DOOR STOP For double cavity application

ONE TOUCH RELEASE (Available separately)

#### **EVOLUTION COMPLETE**

### THE CAVITY UNIT HAS EVOLVED

The Evolution Complete is the perfect flush cavity sliding door system.

Hume Doors have designed the Evolution Complete to incorporate our one touch release and soft closing technology, allowing for the most effortless operation of any sliding door system.

#### FEAUTURES: ONE TOUCH RELEASE SYSTEM

- · Holds door flush in cavity
- · One touch to release door
- Effortless operation
- Perfect for the Evolution cavity range

#### FEATURES: SOFT CLOSER SYSTEM

- Prevents door slamming
- · Effortless operation
- Perfect addition for cavity units

#### **EVOLUTION STEEL**

#### PREMIUM METAL CAVITY UNIT

- Top of the range with galvanised steel back posts slats and track - termite proof
- Smooth 4 wheel ball bearing carriages
- Jump free U track smooth operation
- Maximum door mass 70kg
- Quick release mechanism to easily remove door for painting or modification

#### **EVOLUTION TIMBER**

#### TIMBER DELUXE CAVITY UNIT

- · Same architrave height as a hinged door
- · Smooth 4 wheel ball bearing carriages
- · Jump free U track smooth operation
- · Maximum door mass 70kg
- Quick release mechanism to easily remove door for painting or modification
  - Available in plain or treated timber

### **STEEL DOOR FRAME WARRANTY**

Subject to terms and conditions set forth herein, steel door frames manufactured and/or supplied by: Hume Doors & Timber (Aust) Pty. Ltd., Hume Doors & Timber (Qld) Pty. Ltd., Hume Doors & Timber (Vic) Pty. Ltd., Hume Doors & Timber (SA) Pty. Ltd. or Hume Doors & Timber (WA) Pty. Ltd. (hereinafter referred to as "the Company") are warranted by the manufacturer and/or supplier for one year from the date of shipment by the manufacturer and/or supplier to be of good material and workmanship, free from defects which render them unserviceable or unfit for the use for which they were manufactured.

#### THE COMPANY WARRANTS:

- 1. Goods manufactured and/or supplied for a period of one (1) year as from the date of shipment, to be free from defects in material and workmanship which would render them unserviceable or unfit for normal use
- 2. To the extent permitted by law or the express provision of any stature or otherwise hereby expressly excluded and in respect warranties that cannot be so excluded, these terms and conditions shall be read such that those statutory warranties are read as being in additional to the warranties hereby given.
- 3. Subject to Clause 2, the warranty in Clause 1 shall be read subject to the following matters being excluded as defects:

- 3.1 Frames not accorded reasonable treatment by the customer.
- 3.2 Damage or defects arising out of, or in connection with, shipment or storage after frames leave the control of the company (i.e. delivered to site or handed over to a carrier). Frames must be inspected by the customer for visible defects immediately upon delivery.
- 3.3 Claims for non conforming deliveries (incomplete defective or incorrectly supplied) will only be considered if made within 3 working days of receipt or delivery of frames. All delivery checks are the responsibility of the customer.
- 3.4 Under NO circumstance will the company be liable if frames are installed before checking that they are supplied correctly and are free from defects.
- 3.5 Factory priming is only to protect frames in transport and general handling it is the responsibility of the customer to immediately on delivery of all frames apply 2 coats of compatible sealing priming to ensure corrosion or the like does not occur.
- 3.6 It is the responsibility of the installer to ensure that the frames are installed plumb, square and suitably anchored using the correct fixing points.
- 3.7 Storage and security of the frames is not the responsibility of the company.
- 3.8 Stainless steel hinges are required to be maintained every 2 months to ensure prevention of tarnishing and corrosion.

## **GUARANTEE DOORS**

Our products come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Subject to terms and conditions set forth herein, doors manufactured by: Hume Doors & Timber (Aust) Pty. Ltd., Hume Doors & Timber (Qld) Pty. Ltd., Hume Doors & Timber (Vic) Pty. Ltd., Hume Doors & Timber (SA) Pty. Ltd. or Hume Doors & Timber (WA) Pty. Ltd. (hereinafter referred to as "the Company") are guaranteed by the manufacturer for five years from the date of shipment by the manufacturer to be of good material and workmanship, free from defects which render them unserviceable or unfit for the use for which they were manufactured.

#### TERMS AND CONDITIONS

Natural variations in the colour, texture or grain pattern of the wood or MDF are not to be considered defects. Doors must be accorded reasonable treatment by the purchaser and should be stored or hung in dry buildings and not in damp, moist or freshly plastered areas. The utility or structural strength must not be impaired in the fitting of the door, the application of hardware, or cutting and altering of the door for lights, louvres, panels or any special details. A maximum of 3mm may be trimmed from any edge of the door. This must be done evenly. Normal "showthrough" of frame components in doors shall not be considered a defect. Entrance/solid doors up to 2040 x 820 require three hinges, larger doors require four hinges or pivot system. ENTRANCE DOORS SHOULD BE HUNG IN WEATHER PROTECTED AREAS. Doors and door systems including pivot systems that are installed in a fully exposed situation including opening out doors will not be warranted unless there is adequate overhead protection. Immediately after fitting, and prior to hanging, the entire door, including the top and bottom edges, must receive two coats of

undercoat and two coats of paint. This includes doors that are supplied raw or factory primed. If staining, exterior grade varnish or sealer must be used and its application to be equivalent to paint finish, to prevent absorption of moisture. Semi gloss or satin finishes are recommended for all doors to reduce "show-through". Exterior finishes to be applied strictly in accordance with paint manufacturers instructions. Entrance and exterior doors should be finished in light reflective colours to reduce the risk of heat absorption which may cause warping. DARK COLOURS MAY VOID WARRANTY. Regular maintenance should be provided to prevent deterioration. Where any legislation provides for remedies for the Company's breach of a condition or warranty whether statutory or otherwise, then, at the Company's option, the customer's sole remedy for such breach except a breach of Section 69 of the Trade Practices Act will be limited to: such remedy, or the repair of the products, or the replacement of the products or the re-supply of the products; or the payment of the cost of replacing the products; or the cost of having the services supplied again; or the reprovision of the services. No claim will be accepted unless notified in writing to the Company within seven (7) days of the date of delivery of the products or the supply of the services. The Company will not be held responsible for additional charges of hanging, painting or other charges arising from the replacement

The Company will not be held responsible for additional charges of hanging, painting or other charges arising from the replacement of doors. Any such defects must be brought to the attention of the manufacturer when discovered and in any event within five years from the date of shipment by the Company. The Company is not liable to reimburse any purchaser for doors repaired or replaced without the prior written consent of the Company to such repair or replacement. The Company will not assume responsibility for doors which become defective because of failure to follow these conditions or hazards of shipment or storage, after doors leave the control of the Company. The Company will not be liable for any costs, claims, damages or demands arising from the personal injury, loss or damage whatsoever occurring to the customer or its agents, servants as a result of either acts or omissions of the customer. The Company will not be liable for any consequential loss or damage, whether due to its negligence or otherwise. The

Company will not be liable to the customer for the Company's failure to comply with its obligations to the customer due to any cause beyond the Company's reasonable control and the Company's obligations affected by such cause are suspended while the cause continues to prevent or hinder the Company's performance.

#### **ADVISORY NOTE**

Considerable damage can occur during the delivery of doors particularly to country areas. "Special Packaging" is recommended (optional extra cost) in an attempt to prevent transit damage. The Company is not responsible for any transit damage.

#### INTERPRETATION OF WARP

Warp shall be interpreted as meaning the cupping/bowing or twisting of doors. It refers to distortion within the door itself and not its relationship to the jambs or frame in which it is hung. Warp exceeding 5mm for doors up to 2100 x 920mm, 6mm for doors over 2100 x 920mm and up to 2340 x 920mm and 8mm for doors up to 2340 x 1200mm shall be considered a defect. Doors in excess of 2340mm high or 1200mm wide are not guaranteed against warp.

#### **EXCLUSIONS**

The guarantee against warp does not apply to the following: a. Doors with face veneers of different species.

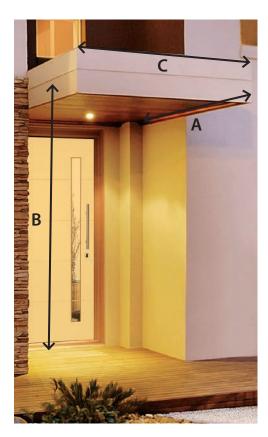

b. Doors that are improperly hung or do not swing freely.

c. External flush doors which have been painted or stained dark colours, or different colours each face.

Experience has demonstrated that when warp occurs after doors have been delivered to storage or building sites, it is usually due to improper storage or adverse moisture conditions after hanging and not to faulty manufacture. The Company will accept no responsibility for doors when moisture content of the timber falls below 12% or exceeds 18%. The Company will not accept responsibility for conditions wholly beyond its control. However, the Company should be consulted promptly if excessive warping occurs to provide assistance in overcoming the difficulty.

## OVERHEAD PROTECTION

With Australia's climate extremes exterior/entrance doors will weather differently and timber doors are more susceptible to the elements than steel, aluminium or fibreglass doors.

Depending on your location and aspect the required overhead protection will vary, with tropical areas generally requiring more overhang than southern states. The chart below will assist in determining the size of overhead protection which will vary depending on home design and adjacent walls.

Dimension 'C' – subject to adjacent walls – minimum width same width as entry frame Note: colour choice for your exterior door will also affect weathering. Dark colours absorb heat, accelerating door deterioration, warping and bowing. For door guarantee refer page 52.

CLIMATE	DOOR DIRECTION									
	North	South	East	West						
Coastal	A = 1/2 B	A = B	A = 1/2 B	A = B						
Tropical	A = B	A = B	A = B	A = B						
Arid	A = B	A = 1/2 B	A = B	A = 1/2 B						
Mild	A = 1/2 B	A = 1/2 B	A = 1/2 B	A = B						

## CARE & MAINTENANCE

- 1. After selecting and purchasing your Hume door, store flat in a dry, well ventilated area prior to installation.
- 2. Your timber door may be affected by changes in temperature, moisture and location.
- 3. Before fitting the door, all six door surfaces should be sealed initially then after installation painted, stained or clear finished with good quality products. Follow the paint manufacturer's instructions with the correct number of coats on ALL surfaces.
- 4. Light reflective colours are recommended for Entrance Doors to reduce the possibility of bow, twist or warp. Dark colours may void Hume guarantee. Semi gloss finishes are recommended. Paint with a light reflectance value (LRV) finish greater than 50 should be used on External Doors. White LRV approx 95, Black LRV approx 5.
- 5. Use the same colour on all six door surfaces. Different colours may cause doors to
- 6. Entrance Doors require overhead protection (above).
- 7. Location and fitting of your door furniture depends on door construction. Honeycomb core doors have a lock block (piece of timber) located generally on the side with the Hume label and door furniture should be fitted in this location. Solid doors may have door furniture installed at any selected height, either side of door.
- 8. Door maintenance is necessary for long term performance and periodic inspections are recommended. At the first signs of deterioration, your door should be properly refinished, making sure that all bottom surfaces of the door receive proper resealing and painting.
- 9. To clean your door, use a damp cloth. Do not hose or use chemicals or abrasives on your door. Lightly oil hinges and door furniture for optimum performance.
